Introduction

Dear Respondent

We are Master's students at Cavendish University conducting an academic study on how the order and adjustment of online learning content relate to students completing their modules in private universities in Uganda.

In this questionnaire, **adaptive content sequencing** means that an e-learning system changes the order, difficulty, pace or next activity according to a student's performance, progress or learning needs. Examples include prerequisite checks, recommended next lessons, remedial material after a low score and more advanced material after mastery.

Your responses will be confidential and used only for academic purposes. Do not write your name. Participation is voluntary, and you may stop at any time without penalty. The questionnaire takes about 8 to 10 minutes. Please answer according to your actual experience.

Consent

By selecting Yes, you confirm that you have read the information above, are at least 18 years old and freely agree to participate.

- ☐ Yes, I agree to participate
- ☐ No, I do not agree to participate

If you selected No, please do not continue with the questionnaire.
